# Non-Concussive Basin Tap

## QK23051 - Single Tap

### Installation

It is recommended that a strainer or filter is installed upstream of the tap or shower to prevent debris entering valve, causing damage or leakage.

### Technical Specification

Recommended operational pressure:	1 to 5 bar
Maximum test pressure:	5 bar
Maximum hot water temperature:	80°C
Working temperature range:	50 to 60°C
Maximum pressure difference between hot and cold water:	1.6 bar

Time and flow rate are given in the table.

Type	Time - seconds	Flowrate @ 3 bar
Tap	15±5	6 l/m

### Flow Setting

The flow rate depends on the position of the reference (located on the cartridge body) in the seat of the plastic cup.

The flow is a function of pressure as shown in table.

To adjust the flow rate proceed as follows:

- 1 Unscrew the cartridge from the tap body and remove the plastic cup.
- 2 Select the position desired on the cup positions 1 to 5.
- 3 Screw back the cartridge into the tap body.

To clean the filter follow the procedure below;

- 1 Isolate the hot/cold water supply
- 2 Unscrew the cartridge from the tap body and remove the container
- 4 Clean the filter under running water
- 5 Refit the cartridge into the body, making sure the cup is set to the desired position.
